

## CHAPTER V

### CONCLUSION AND SUGGESTIONS

#### 5.1 Conclusion

In this chapter, the researcher explains that the application of verbal interaction between lecturer and students in teaching speaking to English class students in the 1st semester of speaking for beginner level subjects, in the calculations, most students are interested in speaking and are more enthusiastic about learning after using verbal communication methods as an approach. Lecture to students. It can be seen that 83% of students are confident in speaking English and expressing their opinions during the learning process. and 17% of students due to lack of interaction between fellow friends. Based on the responses obtained by students regarding the process of learning to speak using the verbal interaction method, the researchers found that students' responses to speaking English were better and students were also able to express their opinions.

This research can be said, that the application of verbal interaction between lecturer and students in teaching speaking to English education students in one semester can help students to practice speaking well and students' perceptions in this activity can be very liked and encourage to speak and express opinions.

## 5.2 Suggestion

On this occasion, the author would like to convey suggestions so that later this research will have benefits for many parties, including:

1. For English lecturers, they can apply the use of good verbal interactions during the learning process. Because in this study it has been proven that the use of verbal interaction is good for use in the learning process. because it can increase students' enthusiasm for learning. and lecturers should also increase face-to-face classes because students prefer face-to-face classes so they can understand during the learning process
2. For students With this research students can be more involved in the learning process such as the courage to ask questions and dare to express opinions using English.
3. For other researchers who are interested in conducting the same research, it is hoped that the results of this study can be used as appropriate scientific information. To expand information about research.

With the suggestions put forward by the researcher, it can be of concern to all parties. Thus, hopefully the results of this research can be useful, especially for those who carry out this research and also readers in general, and expect suggestions and constructive criticism, so that they can develop and improve future research .
