

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter, the presents conclusion and suggestion on what was discussed in the previous chapter.

5.1 Conclusion

Based on research finding and discussions of research on Using YouTube as A Learning Media to Improve Speaking Skills: Students' Perceptions, during learning at MTs Nurul Islam, it can be concluded as follows.

The perception of MTs Nurul Islam students in learning speaking skills with YouTube media is categorized as good. These results are based on the results of several aspects of learning which include: Preparation, Implementation, Facilities, the student's satisfaction, Student's ability and Learning model using YouTube media that can be applied in the class. The obstacles found in the process of learning to speak with YouTube, namely: internet signal constraints in some students, a lack of confidence that makes them little to practice, and there are students who are passive or lack of interaction in class.

5.2 Suggestion

Based on the results of this study, this researcher can give suggestions as follow:

1. For School

School should pay more attention to the obstacles that faced by students in the implementation of speaking learning to find solutions so that students can learn better even though they still use the online learning model.

2. For Teachers

Teachers must innovate in teaching and learning activities, so that speaking learning can become interesting and fun learning activities so that students have the ability and understanding of the material being studied can be further improved.

3. For Students

Students should equip themselves with knowledge of learn to speak and prepare all preparations well and train yourself more to appear confident when speaking, so that learning can run optimally.

4. For other Researchers

This researcher is only limited to students' perceptions learning to speak in English subjects. It is hoped the next researchers will investigate in the same topic with different object.
