CHAPTER V
CONCLUSIONS AND SUGGESTIONS

In this chapter, researchers provide conclusions and suggestions based on the findings in this study.

A. Conclusions

The researcher will draw the following conclusions from the research that has been conducted by means of observation, interviews and documentation at the English Club of a private university. In teaching English vocabulary learning, English Club administrators use LCD projectors, laptops, white boards, videos from YouTube, and Educandy applications as a means of learning together.

In using learning media, English Club administrators choose to use the Educandy platform as a means of learning vocabulary with English Club members. English Club administrators consider the suitability of the media with learning objectives which leads to media support, learning content, ease of obtaining media, and skills in using media.

Implementation of learning media with Educandy platform for English Club participants. The administrator prepares the learning media before the activity takes place. The organization manager turns on his laptop, open and display a video that will be watch with English Club members. After watch the video, the organization's management displays an Educandy platform through a Liquid Crystal Display (LCD). All members will look and pay attention to the screen, there the English Club administrator said that he had made a game from the platform with some vocabulary obtained from the motivational video, there were some vocabulary that was less familiar to the ears will be record and make it as a game on the Educandy platform. The game will do together, so the vocabulary learning this time will be more active and communicative for the members.

Thusly, in this study, the researcher can conclude that the management of the English Club organization at a private university is good at determining and use learning media from the Educandy platform as a means of learning

vocabulary together. This can be seen from the results in implementing learning media in teaching English vocabulary is in accordance with the learning objectives.

B. Suggestions

From the findings presented earlier in chapter four, there are several suggestions that can be taken into consideration

1. It is hoped that the management of the English Club organization at the Private University can find out and attend workshops related to the implementation of digital media, educational platforms to better understand and develop skills in joint learning in an educational forum. Updating about media learning or learning platforms that can be integrated in English teaching is considered capable of providing direction to English Club members so that they can utilize the media they have. One of them is by recommending learning applications or platforms that can be used for learning.

2. It is expected that members of the English Club at the Private University can cooperate with the English Club management in controlling the use of applications or platforms when learning takes place so that both parties can benefit from their use.

3. It is hoped that this research can be used as a reference source for further research related to the use of Educandy learning media in teaching English vocabulary. Due to the limited knowledge and methodology of the researcher, the results of this study are far from perfect. So for other researchers it is recommended to review this research problem. However, the researcher hopes that these results can be used as a reference for further research.
